The amendment filed on 1 July 2005 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03).

The remaining claims are not readable on the elected invention because:

The remaining claims claim the application of sound source dynamics to sound event parameters to produce a holographic acoustical image of a sound event. The elected invention (i.e., the invention of Claim 1, constructively elected by original presentation) claims capturing and reproducing sound by defining an enclosing surface around a sound source, capturing sound field parameters using an array of transducers at predetermined locations on the surface and recreating the sound field by driving a plurality of loudspeakers at predetermined locations. The remaining claims (exemplified by Claim 11) claim determining information related to holographic acoustical dynamics of a sound source and applying those dynamics to a parameter of a sound event.

As such, the elected invention and the remaining claims are distinct since each has limitations not anticipated by or obvious in view of the other.

In addition, the elected invention is directed to capturing and reproducing sound, classified under class 369, subclass 1, while the remaining claims are directed to application of sound source dynamics to sound event parameters, classified under class 381, subclass 94.1.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
